

OVERVIEW OF TERM 3 ATTENDANCE

May Attendance

38

Total Attendance in May

37

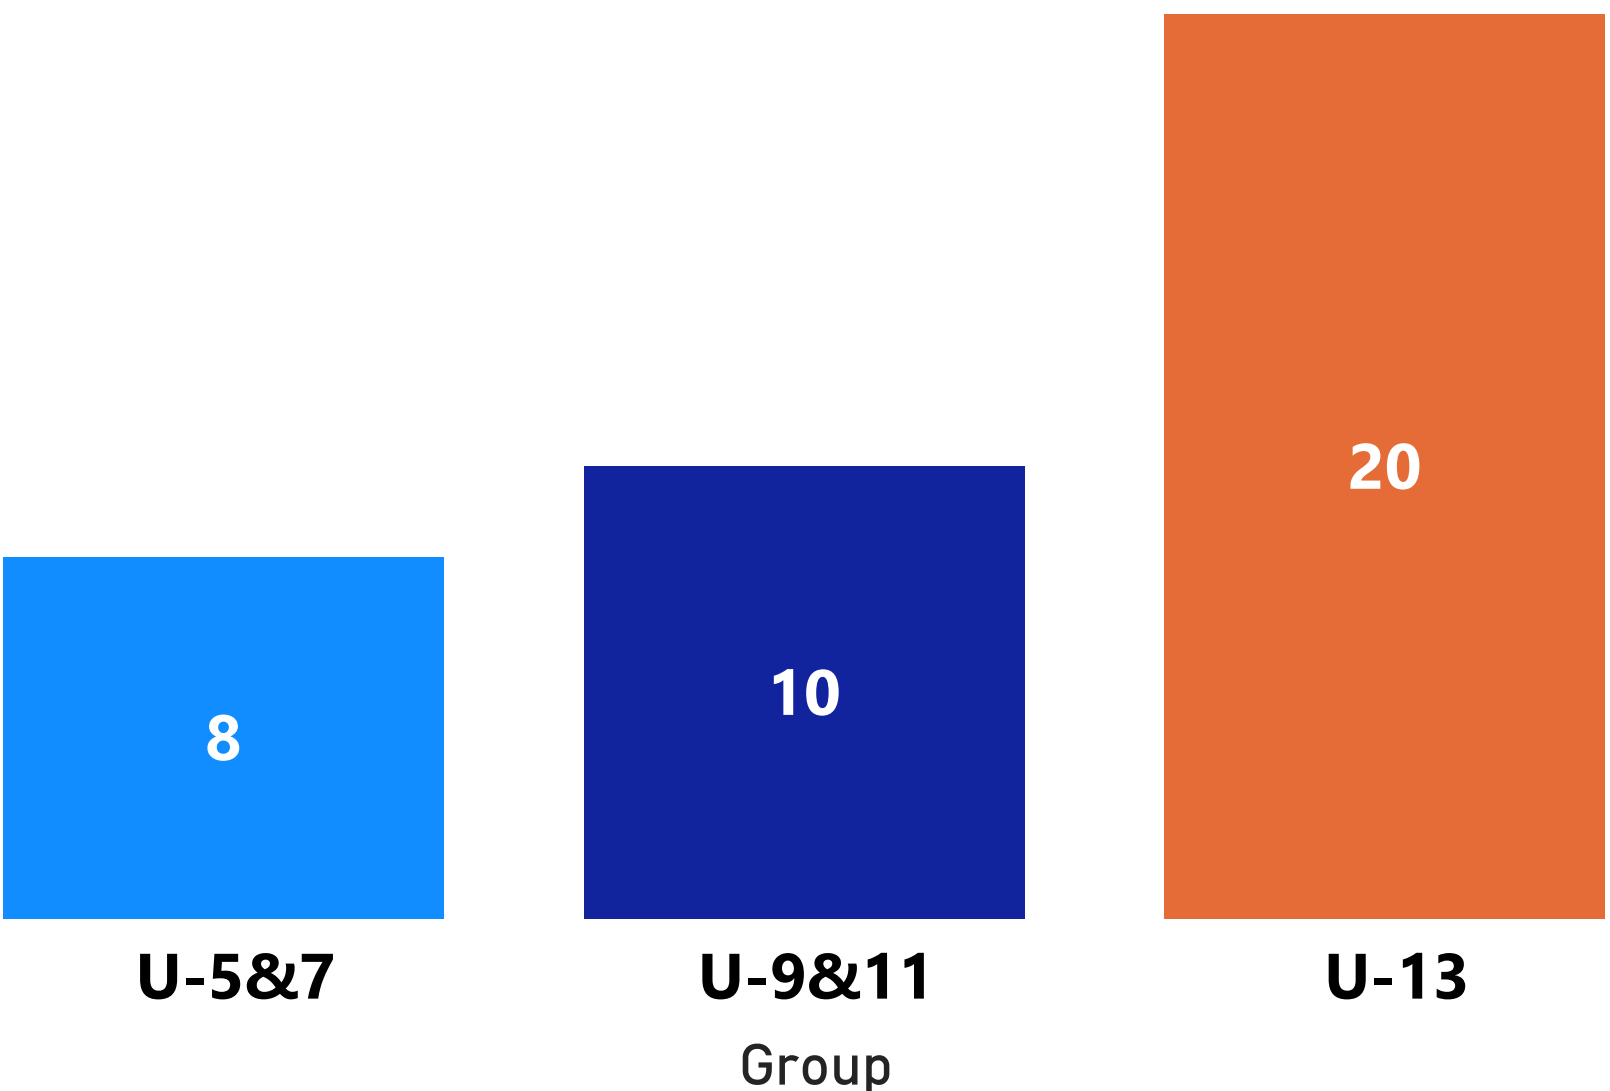

Total Attendance in June

This term had the highest number of students attending the afterschool

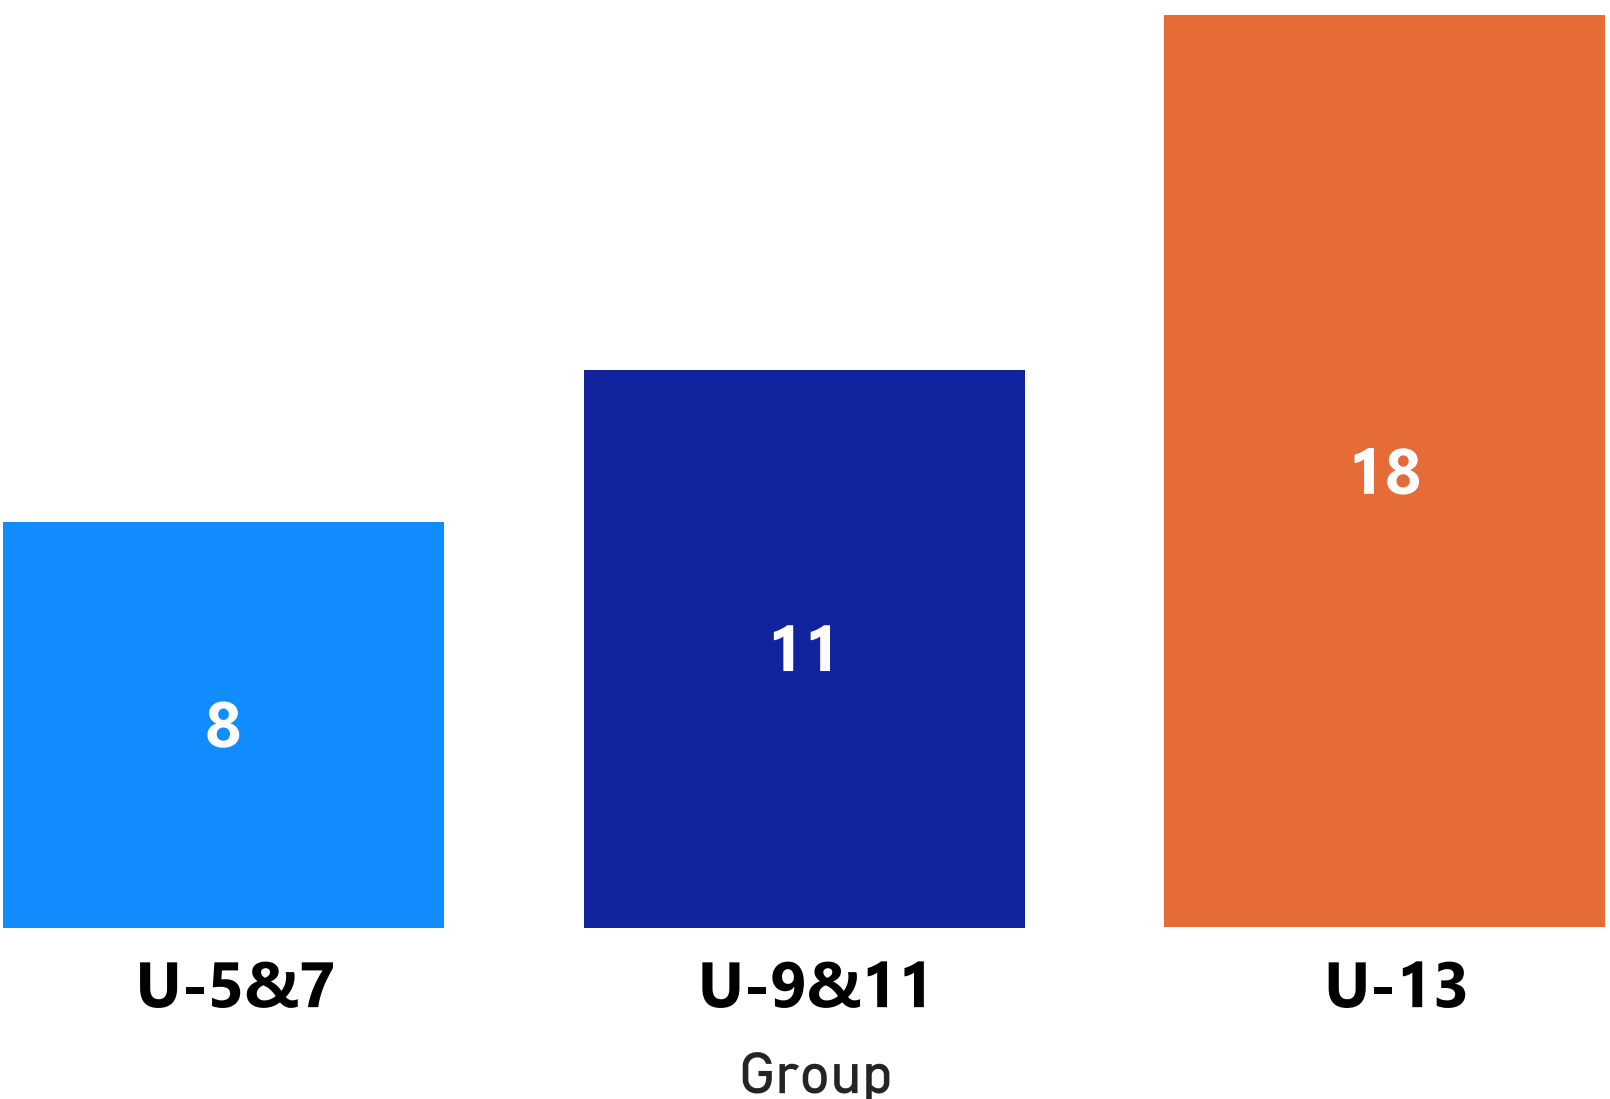

Peak attendance throughout the academic year 2022/2023 was registered in the month of May at 38, followed closely by June at 37.

A number of factors played in achieving these numbers, including the students having a uniform training kit, retention of current players with activities outside of training more-so matches and friendlies, referrals and in-school marketing of afterschool.

With more in store in the next academic year, it is expected that more students will be attracted to join the afterschool football program
